

March 29, 1995

LB 168, 882

LR 46, 86

that's normally the way legislation is handled and that's why we have three readings and all that. I fail to find why this bill is so...such a lightning rod...

PRESIDENT ROBAK: One minute.

SENATOR BROMM: ...that we have to take so much of our time in the process here because all of us know we've got significant things lying ahead of us, important to Senator Chambers, important to all of us, and I, for one, would simply like to get this thing to a vote, and maybe those who are opposed have convinced enough people that it won't advance. I don't know, but I guess I will leave a question open, as Senator Withem did, why, with this particular bill, do we need to spend this amount of time at this stage of the bill, when I think everything has been said? Senator Chambers is extremely creative, as are some others in the body, but much, much has been said about what is wrong with the bill. I think those who support it have said what they felt needed to be said. So what is to be gained by belaboring the bill? And that is the question I will leave you with. Thank you, Madam President.

PRESIDENT ROBAK: Thank you, Senator Bromm. Mr. Clerk. Items for the record.

CLERK: Madam President, amendments to be printed to LB 882 by Senator Landis. Government Committee reports LR 46CA to General File with amendments attached. And I have a new resolution by Senator Brown. (Read brief explanation of LR 86). That will be laid over. (See pages 1401-02 of the Legislative Journal.)

A priority motion, Madam President. Senator Bernard-Stevens would move to recess until one-thirty this afternoon.

PRESIDENT ROBAK: The motion before you is a motion to recess. All those in favor say aye. All those opposed nay. The Chair is in doubt. The motion again is the motion to recess. All those in favor say aye. All those opposed nay. We are in recess.

RECESS
